OFFICE OF COLLECTION AND DISSEMINATION

REPORT FOR OCTOBER 1950

I. Biographic Register Division

Answered 198 requests for information on 2,498 foreign personalities and 55 related organizations, and prepared machine listings on 1,628 individuals in response to 3 requests.

Biographic data supplied to requesters included: [redacted]

[redacted] for ORE; summary cards on 1,196 Soviet scientists working on guided weapons, for OSI; reports on 66 Soviet metallurgists and a list of 44 metallurgical institutes and laboratories, [redacted] and data on [redacted] for ORE.

II. Graphics Register Division

Supplied 6,957 photographs in response to 214 requests, of which 104 were received from CIA offices and 110 from other agencies. These photographs included examples of anti-U. S. propaganda and material for counter propaganda to be used in psychological warfare leaflets, such as atrocity pictures from Korea.

Arranged with [redacted] Office of Operations, for a member of the Graphics Register Division staff to visit their field offices in order to explain the photograph requirements of CIA, and give guidance to collection activities.

Serviced 145 requests relating to motion picture films, including 37 group showings attended by 486 persons from CIA and the other IAC agencies, and 119 films supplied in response to 71 loan requests. Intellofax listings, produced from the machine index of available films, were provided in reply to seven requests and supplied data on 2,836 films pertaining to the specified subjects.

Procured a USSR feature film described in a State cable as a powerful pro-Soviet propaganda tool. This film was obtained through the cooperation of Office of Operations, Army, and Customs. It is an excellent example of the type of propaganda now being used.

III. Industrial Register Division

Answered 133 inquiries on foreign industrial activities, of which 48 were received from ORE, 44 from OSI, 31 from other CIA offices, and 10 from other IAC agencies. The material supplied to requesters included: over 25,000 Industrial Card File (ICF) cards on 1,851 plants in response to 94 of the requests; a machine listing and a written report for 2 requests; and various reference materials to satisfy 37 requests.

Some typical answers included information on: [redacted] Central [redacted] for AEC; copper smelters in USSR, [redacted] guided missiles production and experiments in USSR, for OSI; and certain tank and tractor plants in USSR, for ORE.

IV. Liaison Division

Provided liaison assistance for a CIA survey of 19 non-IAC agencies, and of the IAC agencies, to determine their economic intelligence potential and to organize a systematic distribution of responsibility for satisfying requirements in the field. Obtained from the Oil and Gas Division of Interior Department a useful collection of early issues of "USSR in Construction" and "Economic Review of the Soviet Union", together with several Russian language books on petroleum.

V. CIA Library Division

Procedures are being developed to satisfy requests for documents by the use of available copying equipment for the rapid reproduction of single copy documents in the reference files. This will give requesters a retention copy of the document instead of a loan copy, and will keep the reference files intact for subsequent requests and searches.

The Chief of CIA Library, in his capacity as CIA Top Secret Control Officer, is holding a series of meetings with the Top Secret Area Control Officers to improve the overall control system and develop uniform understanding of procedures among the several areas.

VI. Machine Methods Division

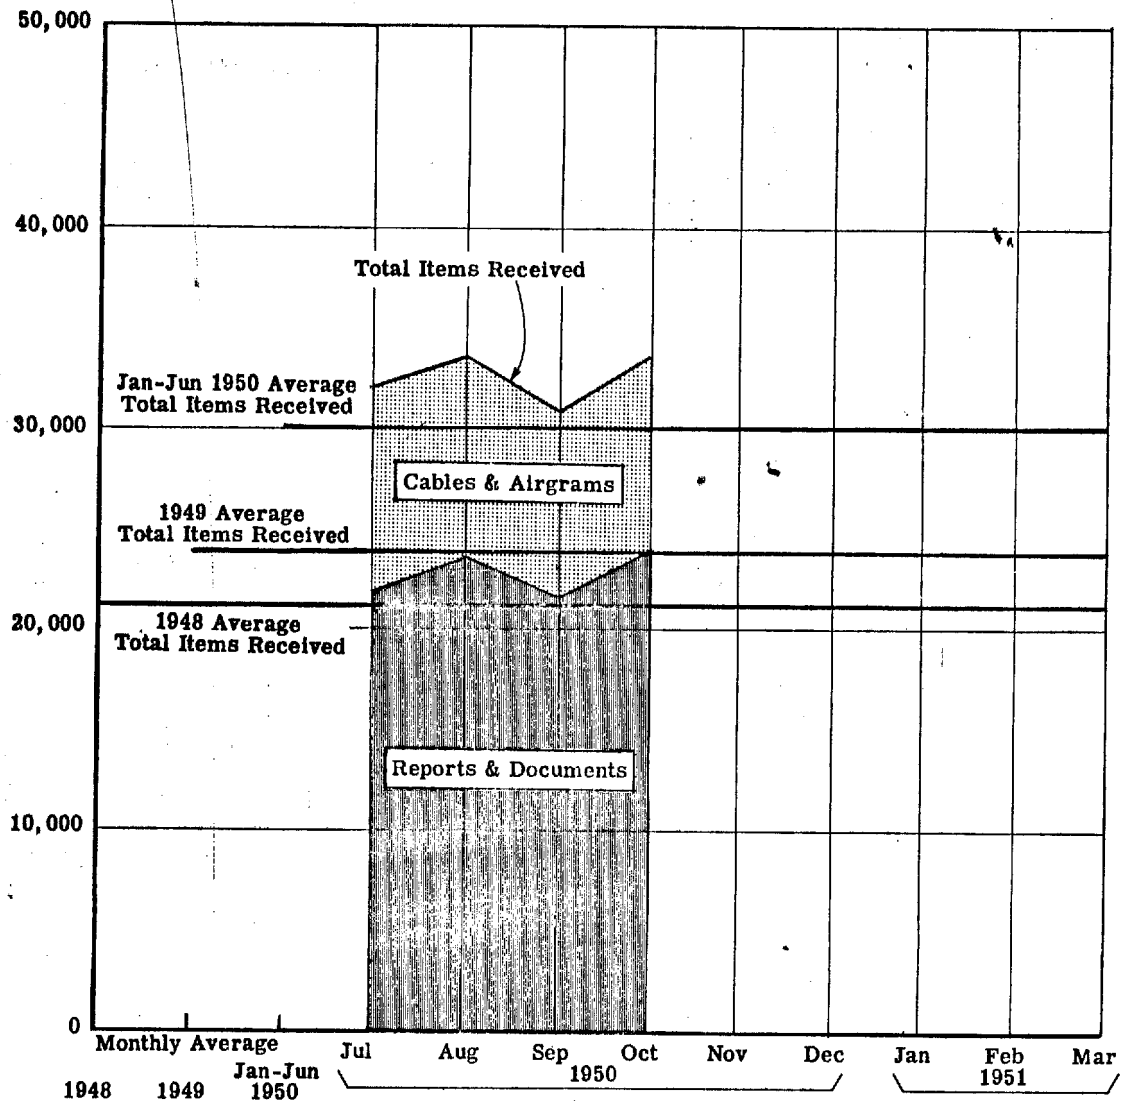

The Intellofax system was used to answer 218 requests for reference searches received by the Library from CIA and other IAC agencies. Pertinent information on 35,066 cards selected by the machine index was made available to the requesters. The machine index to foreign radio broadcasts, based on the Foreign Broadcast Information Division daily summary, supplied 472 references pertinent to 9 requests.

A visit was made to the Business Machines Show in New York in order to keep informed on new developments in this field. Further investigation is being made of certain equipment and methods that may be of use to CIA.

Note: The requests recorded range from informal telephone or personal calls to formal requirements that may involve extensive research and coordination with other agencies.

The totals exclude the many informal inquiries for spot information that are handled without being recorded.

The Liaison Division totals include only formal requests that require collection directives to be issued to CIA offices and to other agencies. Many other Liaison services are rendered without being recorded.

The Library totals include only requests for reference searches and bibliographies. Requests for documents are reflected in the figure for documents.

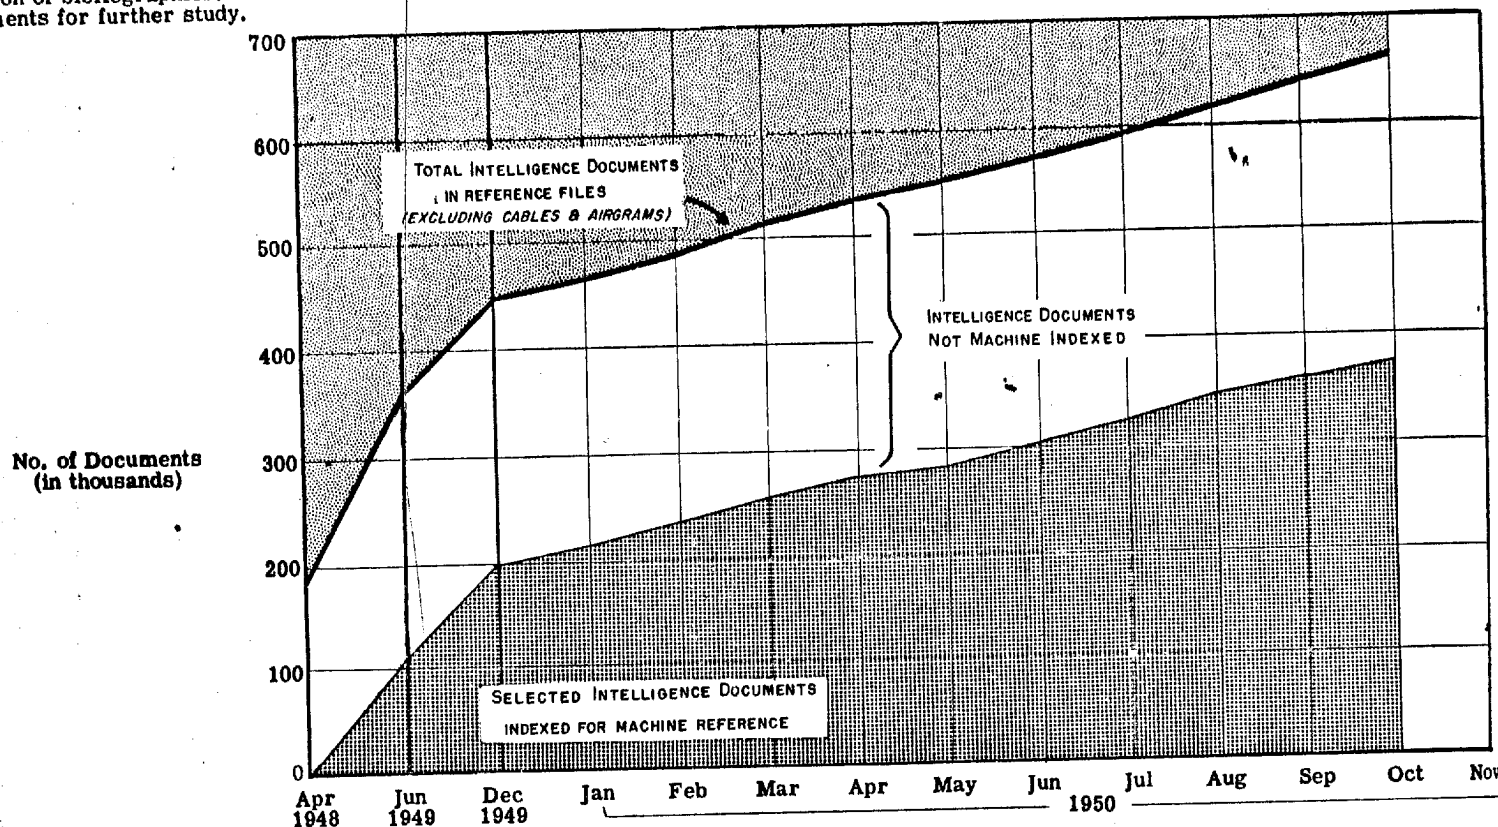

SECRET

OCD-CIA LIBRARY DIVISION

The Library Intellofax File provides a machine index to the content of selected intelligence documents and gives quick reference to available material on a specified subject.

It consists of machine cards on which coded information is punched to indicate the subject and area coverage of a document. In addition, the title and source of the document with other pertinent data is reproduced on the punched cards from the document control mat. Abstracts of selected documents may also be reproduced on the cards.

A machine run of these punched cards will select those relating to a specified subject or area, for the use of analysts or the preparation of bibliographies. The information on the cards may be sufficient for some purposes, or it may serve as a guide to required documents for further study.

OCD-GRAPHICS REGISTER DIVISION

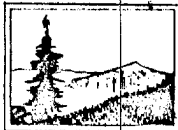

As of 31 October 1950

FILM BRANCH

The Branch provides a reference and projection service for any film title from any source and provides suggestions for motion picture coverage in any field of interest. The Central Index File now contains 6,695 film titles.

During October the Film Branch presented 29 film subjects at 37 group showings which were attended by 486 people. 119 films were supplied in response to 71 loan requests. 68 films were screened for analysis of content material.

PHOTOGRAPH BRANCH

The Branch maintains and is constantly developing a comprehensive central reference file of photographs of all foreign areas and subject matter of interest to intelligence research. There is also available an extensive file of photographs of foreign persons of significance to the United States Government, including scientific, political, industrial, military, and other foreign persons prominent in their respective countries. The Branch can also draw on the files of all IAC agencies, other government agencies, or commercial or private collections to procure photographs of any area or subject not included in the Graphics Register Division files.

The number of ground photographs available in the Graphics Register Division files now total 500,313.
